Welcome to the TAG Farnborough Airport Experience

The most modern airport of its kind offering a 5 star service with no compromises.
TAG Farnborough Airport offers a complete portfolio of business aviation services dedicated to delivering a peerless customer experience. The main airport buildings are each individually tailored to fit their specific functions, combining to create a distinctive setting for TAG Farnborough Airport’s service excellence.
A sense of calm prevails when entering the VIP passenger terminal and relaxing passenger lounges afford efficient flight arrivals or departures creating a personal air travel experience without parallel. Every need is anticipated for VIP passengers, coupled with unrivalled aircraft handling and crew support.

TAG Farnborough Airport has won many awards including the No. 1 Fixed Based Operation (FBO) in various polls around the world. This is a true reflection of the quality of service we strive to provide at the airport.
With the addition of a new set of hangars in 2011, TAG Farnborough Airport has over 22,000 m² of hangarage situated within the wave-shaped buildings along with the facilities you would expect from Europe’s premier private business airport for both based and transient aircraft.
TAG and the Environment

TAG Farnborough Airport is committed to identifying and minimising the effects of aviation on the local environment. The airport employs a dedicated Environment Management team to ensure legal compliance and undertake a wide range of monitoring and reporting on all relevant aspects of pollution and control. These include Aircraft Noise and Track Keeping, Air Quality, Surface Water Drainage and Hazardous Waste Management. The team also operates a dedicated Complaints and Reporting Line which can be used by members of the public to submit questions or concerns regarding airport operations.

The TAG Farnborough Airport Sustainability Charter identifies the reduction of Carbon Dioxide Emissions as a key element of future development. To assist in meeting strict reduction targets the airport has become Airport Carbon Accredited and has committed to reaching Carbon Neutrality by 2019.

In accordance with the Rushmoor Borough Council Planning Agreement, funds are provided by TAG through a Community & Environment Levy on all business aviation movements. These funds are presented to the local council for use in local environment enhancement projects.
