
Scope

The energy policy will be applied to all TFA operations and will encompass the energy use of staff and TFA owned properties that are occupied by tenants. It does not seek to encompass equipment or machinery used by tenant companies operating at the Airport or fuels used in connection with their company operations and staff travel.

Policy Statement

TAG Farnborough Airport (TFA) is committed to reinforcing, and where possible accelerating upward trends in energy efficiency across the site, in accordance with the Master Plan. This will be under continual review to ensure on-going improvement as a major driver in achieving **Airport Carbon Accreditation at the Neutrality level**. This Energy Policy will be published to all relevant stakeholders.

Long-term corporate objectives

- *Commit organisational resources to energy management*
- *Minimise overall energy use and associated expenditure*
- *Assign a high priority to energy efficient investments*
- *Determine potential for site renewable energy projects in line with technological advances*
- *Annually review options for procurement of energy from renewable sources*
- *Monitor and manage site energy usage, through an automatic smart metering system*
- *Achieve annual reductions in CO₂ emissions (within chosen metric) until maximum practicable efficiency is met*

Medium-term corporate targets

- *Increase awareness of energy issues amongst TFA staff through site induction*
 - *Ensure responsibility for energy efficiency is accepted at all departmental levels*
 - *Engage with all site service providers on energy issues*
 - *Incentivise site tenants to consider and partake in energy efficiency projects*
 - *Establish, publish, achieve and periodically review performance improvement targets*
 - *Validate ownership of all energy metres on site*
 - *Install smart energy metering site wide*
 - *Develop an energy monitoring program in conjunction with our Energy Broker*
 - *Implement a Travel Plan to reduce fossil fuel use during travel to and from work*
 - *Purchase the most energy efficient plant equipment that meets operational needs*
 - *Report the annual Carbon Footprint and maintain a Carbon Management Plan*
 - *Attain level **3+ Airport Carbon Accreditation** – Neutrality*
-

Reporting

As a measure of performance against this statement TFA will monitor and review:

- Purchased energy usage (kWh per annum)
- Liquid fuel use (litres per annum)
- Carbon footprint (tCO_{2e} per annum)
